

Nothing's more difficult for parents than facing their child's end-of-life.

Coda Alliance, with Meghan Potthoff, Ph.D., developed the **Pediatric GoWish card game** to help parents navigate the unimaginable journey of their child's illness.

Pediatric GoWish is a tool that provides parents a way to think and talk about what's most important to them and their child. Becoming aware of these priorities empowers them to make decisions, facilitates communications with their medical team, solidifies family harmony, helps parents feel prepared to advocate for their child, and lessens their own uncertainties.

Parents who've played Pediatric GoWish said, *"This fog of medical terminology and words that we were living every day was so overwhelming that we didn't even know what to ask. The cards gave me a focused point to organize my thoughts."*
